Summary

Full-Stack Software Engineer with **3+ years** building production applications serving **65K+ annual users**. Expertise in **Python, RESTful API design, and backend systems** with hands-on experience across relational databases (PostgreSQL, SQL) and object databases. Proven ability to architect and deploy scalable web applications with strong foundation in AI/LLM integration, microservices, and modern DevOps practices. AWS Certified Cloud Practitioner.

Professional Experience

 **AI Expert Contributor: DevOps, Snorkel AI** — Contract May 2026 – Present

- Contributing domain expertise on **Claude Code Subagents and Agentic Workflows**; evaluating and rating AI-generated responses for technical accuracy and quality to support LLM fine-tuning
- Producing high-quality training data for DevOps and AI tooling scenarios covering CI/CD pipelines, container orchestration, and multi-agent system design

 **Independent Software Engineer** 2022 – Present

- Built and deployed **BinaryDecimal.com**, web toolkit with **17+ utilities** serving **40K+ users annually** (Markdown editor, password generator, Mermaid diagram viewer)
- Created **MemoDiction.com**, AI-powered dictionary serving **25K+ users annually** with automated content pipeline using OpenAI API and GitHub Actions CI/CD
- Designed and built **Skill Quest**, full-stack AI Learning Planner with JWT auth, PostgreSQL, LLM integration, containerized with Docker and deployed to Railway

Technical Skills

Languages	Python (Adept), Java, TypeScript, JavaScript, SQL, HTML/CSS, C++, Bash
Frontend	React, Vite, Tailwind CSS, Jekyll, Responsive Design
Backend	Spring Boot, Node.js, Flask, Django, RESTful APIs, Microservices, JWT Authentication
Cloud & DevOps	AWS (EC2, S3, Lambda, CloudFront, Route 53, RDS), Docker, GitHub Actions, CI/CD, Serverless
Data & AI	PostgreSQL, OpenAI API, LLM Integration, Prompt Engineering, NLP
Practices	Agile/Scrum, Test-Driven Development, Git Version Control

Technical Projects

-  **Mason Weddings — Client Marketing Website** (*HTML5, CSS3, JavaScript, GitHub Pages, EmailJS*)
- Built **7-page responsive marketing site** from scratch for NYC wedding studio; custom DNS, automated HTTPS, CI/CD via GitHub Pages, and inquiry form with **EmailJS + Gmail OAuth**
 - Advanced CSS effects (parallax hover-blur, gradient overlays); optimized asset repo from **11 GB to ~400 MB**

-  **Enterprise Inventory Management Platform** (*Java, SQL, JavaFX, MVC Architecture*)
- Designed and developed production-ready inventory platform from requirements through deployment with Java, SQL database, JavaFX GUI, and MVC architecture
 - Implemented complete CRUD operations, real-time data synchronization, automated reporting dashboard, error handling, and unit testing

-  **AI-Powered Code Quality Analyzer** (*Python, NLP, React, REST API*)
- Built end-to-end full-stack application with Python Flask backend, React frontend, and RESTful API for automated code quality analysis and best practice recommendations
 - Implemented static code analysis, complexity detection, style guide enforcement, and AI-powered improvement suggestions with user authentication and CI/CD pipeline

Education

Bachelor of Science in Software Engineering , Western Governors University	2025
Front End Web Developer NanoDegree , Udacity	2020

Certifications

AWS Certified Cloud Practitioner 2023 **CompTIA Project+** 2025

Additional: ITIL Foundation, CompTIA A+, Google IT Support Professional

Authorized to work in the United States as a Permanent Resident
